- Water Treatment used for treating drinking water, sewerage / waste water and swimming pool water.
- Agricultural, Chemicals including Pesticides, Herbicides and Fungicides.
- Fertilisers
- Heavy Duty cleaning chemicals such as degreasers, graffiti removers and other

Local Government Procurement (LGP) has been successfully tendering and managing contracts since 2006. The purpose of these contracts is to free up council procurers so that they can concentrate on what it is that they do best.

If you utilise these contracts you will not have to tender yourself. LGP has achieved “prescription” which means that under the Local Government Act you do not need to go to the financial and resource expense of doing it yourself. If you are spending in excess of \$150K on chemicals and not tendering in the regulatory way, you could be in breach of the Act.

Rest assured that “best practice” is observed when LGP tenders. We consult with councils and experts, include councils on our evaluation panels and are constantly on the hunt for feedback.

The contracts we provide are good value. Why? Because we use the buying power of 152 councils to achieve what we can confidently say is a “good price”. More value is returned to you in the form of an annual rebate. When you factor this into the price you’ll be convinced.

It’s not all about price though, suppliers have to meet the strictest of criteria and are monitored closely throughout their tenure. With your feedback we can only improve on future provisions.

Listed here are the supply panel for the Chemicals contract. For further information refer to the website www.lgp.org.au .

A log in and password are required, please contact Angela Tesoriero on (02) 8270 8705 or 0428 289 878.
